### Industrial Electrical

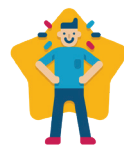

## ABOUT US

**Wiresplus Automation & Electrical** is where advanced electrics are simplified, and your automation needs are meticulously catered to. Spearheaded by a clever electrician with a knack for navigating the most challenging automation requirements, we seamlessly blend electrical and mechanical skills to bring you unparalleled service in pivotal industries such as Automation & Controls and Industrial Electrical.

We don't just provide service; we engineer solutions where electrical and mechanical synergies drive your business forward. Your challenges inspire us to innovate, ensuring you stay ahead in a dynamically evolving industrial landscape.

## CORE VALUES

### OWNERSHIP MENTALITY

We take pride in our work to achieve the highest quality. We are driven to understand and deliver the best results.

### LASTING CONNECTIONS

We establish strong relationships that are built on clear communication and trust.

### GROWTH MINDSET

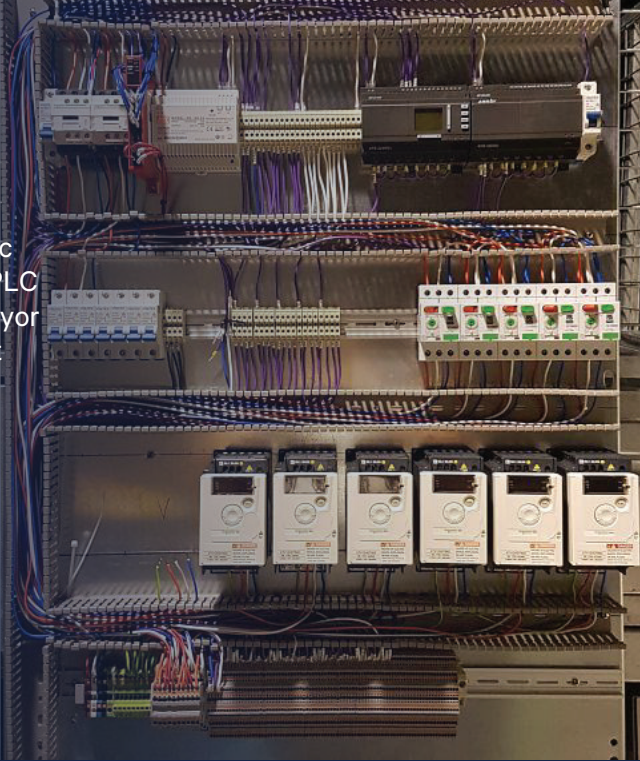

We think outside the box and we're committed to continually learning.

# WHAT WE OFFER

## Automation and Controls

Enter a world where motor controls, start/stop mechanisms, and automatic integrations are not just functionalities but a seamless experience. From PLC and HMI to VSDs, process control and beyond, we ensure that your conveyor systems, machine controls, and building systems are not only efficient but also user-friendly. Whatever the system, our expertise lies in making the complex straightforward and reliable.

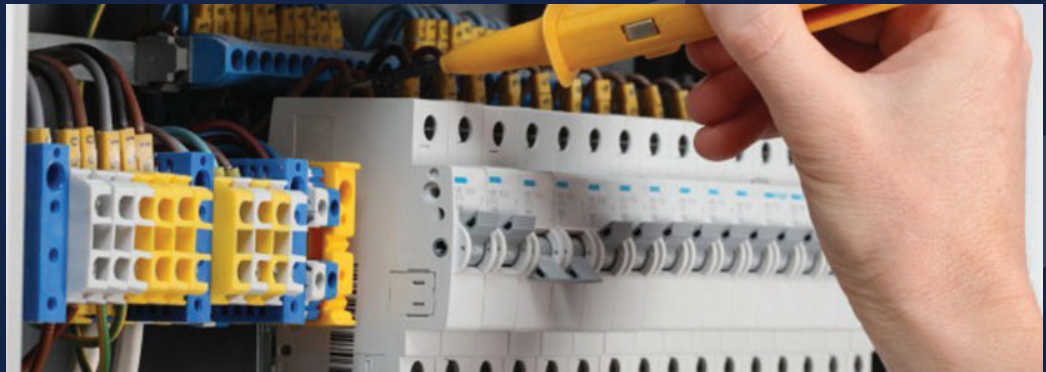

- Motor Controls
- Start/Stop etc
- Automatic / Integration
- PLC and HMI
- VSDs
- Process Control
- Conveyor Systems
- Machine Controls
- Building Management Systems

## Industrial Electrical: Powering Your Industrial Spaces

Illuminate your factories, warehouses, and business premises with our adept industrial electrical services. From installing new wiring and making alterations to ensuring optimal lighting and ventilation, we've got you covered. Our comprehensive offerings extend to controls, machine servicing, breakdown management, new machine installation, and ensuring machine safety. Your industrial electrical needs are met with precision, ensuring your operations run smoothly and safely.

- New wiring
- Alterations / relocations
- Lighting
- Ventilation
- Controls
- Machine servicing
- Breakdowns
- New Machine Installation

## Commercial & Industrial Pumps

Commercial and industrial pumps are more than insignificant mechanisms; they are often the very heartbeat of your operations. We've partnered with reputable suppliers of quality brands to bring you reliability and longevity. With our solid understanding of pumps and pumping, we can install, service, repair and optimize your workflows. From simple pressure pumps to submersible, industrial and even advanced solutions like air-driven diaphragm types, we ensure your business keeps on pumping!
