

Multi Jet Fusion 3D Printing now available in New Zealand.

The logo for BDL 3D is a yellow circle containing the text "BDL" in a bold, sans-serif font above "3D" in a similar font. A small white square is positioned to the right of the "L" in "BDL".

BDL
3D

BDL 3D is NZ's first 3D Print Bureau printing with HP's Multi Jet Fusion Technology. Your parts 3D printed right here in NZ. Printing with MJF offers numerous advantages over traditional manufacturing methods and earlier 3D printing technologies. It's cost effective with short lead times.

Our new HP MJF 5200 printer can print 24 hours a day enabling true industrial scale 3D printing for the first time in New Zealand.

Print functional prototypes, test, make immediate design adjustments and reprint straight away. Reducing unnecessary transportation and storage of parts, print only what you need, when you need it. Design, dyeing and finishing options available. Suitable for any application from one-off bespoke design to volume production. BDL 3D aim to ship your order within 3 days of receiving your print-ready file.

Currently printing in HP 3D High Reusability PA12 (Polyamide, Nylon 12). MFJ Printed items have superior mechanical properties, dimensional stability, heat, impact and chemically resistant.
