

Thank you for your interest in the Shoptech Software. Through this brochure and our live demonstrations, you will see, feel, and experience the most comprehensive, yet user-friendly, shop control package on the market today. After all, our product began its development process in 1984 in a job shop, by shop people. The E2 Shop System is available as a SaaS or an on-premise solution.

Over 8,500 shops worldwide use the E2 Shop System daily. From quote to cash, E2 is the solution that can help take your shop to the next level.

The E2 Shop System is designed specifically for small and mid-sized manufacturing companies. With E2, businesses are able to:

- Estimate their jobs more accurately
- Get real-time job costing
- Schedule their shop floor to eliminate bottlenecks and ship on-time
- Eliminate double entry with a comprehensive solution
- Become more profitable!

The E2 Shop System enables shop owners to effectively control all aspects of shop activity while simultaneously and effectively managing profitability.

estimating, quoting & order processing | inventory & purchasing | scheduling | data collection, time & attendance | shipping | accounting | costing & job tracking

**Total Shop Control**  
Right at Your Fingertips

Whatever your size, we've got you covered.

No shop is TOO SMALL for our BIG RESULTS

Take your shop to the next level with the E2 Shop System. Visit our website today to find a partner in your area.

## Flexible & Modular to Meet Your Needs

Estimating & Quoting	Inventory & Purchasing	Scheduling	Data Collection	Quality	Job Costing & Job Tracking	Shipping	Accounting
Generate estimates that capture job specs and profitability from step one and create orders without delay.	Tie together inventory and purchasing taking the guesswork out of ordering.	A built-in Scheduling Whiteboard provides real time capabilities in seconds.	Keep an up to the minutes picture of current activity and the entire job history.	Manages specific areas of engineering and supply-chain activities for the sole purpose of improving business performance and profitability.	Control workcenters and print the reports you need from job schedules to almost any summary you can think of.	Create Delivery Notes and Bills of Lading with the click of a button.	E2 is able to seamlessly integrate with most accounting programs so there is no double entry.

“E2 allows us to follow our product from the quote to shipping it out the door. Tracking has become so efficient it has cut down on labor costs and paperwork.”

**Jennie Shade,**  
Cole Tooling Systems, Inc.

“Our business and customer base has grown considerably over the past several years, and we have kept up with this rapid growth with the use of the E2 System.”

**William E. Carling,**  
Tri-Kris Company, Inc

## Powerful Tools and Unparallel Local Support

### Contact Management

E2 Contact Management is a completely integrated tool that improves customer service through the sharing of information and is included with the purchase of E2. The key to superior customer service is having everyone: office and shop personnel, customers, and vendors all on the same page. E2 Contact Management gives you the competitive advantage when it comes to customer service.

### Customer Care

Enjoy unparalleled support and customer care. When you work with Shoptech, you and your employees will receive:

- One-on-one assistance from a local, certified Shoptech partner
- Priority response time for service and support
- E-learning on-demand web training videos
- A monthly newsletter
- Access to our Shoptech Community

## What Can E2 Do For You?

We help shops of all kinds and all sizes work smarter for improved efficiencies, greater flexibility — and, of course, bigger profits. E2 delivers what you need to improve how, when and where you use critical business information.
