SPECIALISTS IN SOURCING SOLUTIONS

World's best products

We supply the world's most recognised and trusted brands, sourced direct from international manufacturers, providing choice and ensuring that you have access to the right product or solution at the right price.

Own brand benefits

In-house design and sourcing of our own brand range allows us to offer solutions specifically designed to meet our customer's needs. Developed with input from, and tested by our customers, our own branded product allows complete end-to-end control of manufacturing and the supply chain, guaranteeing quality and the best value.

EXPERIENCED ETHICAL GLOBAL SOURCING

NZ Safety Blackwoods, has operated an International Procurement Office in Shanghai, China since 2006. This office engages with manufacturers from 21 countries, including The European Union, China, The United Kingdom, Brazil, New Zealand, Thailand and emerging markets, such as, Indonesia, Vietnam, Egypt, Turkey, and Africa. Each of these countries has its own legal framework and standards, as well as related risks. NZ Safety Blackwoods has a detailed policy that governs the sourcing ethics activities in other countries.

Our customers can have confidence these robust policies, ongoing audit and review systems remove any potential unethical sourcing risks; including political, corruption, quality and, financial risks from the supply chain.

Quality Control and Audit Process

Our suppliers are constantly monitored under an evaluation programme which considers the quality of the product and service, capability of the organisation to respond to market developments, moral obligations and acceptance of the supplier in relation to workplace practices and the environment. This assists NZ Safety Blackwoods make the most relevant and reliable product recommendations for our customers.

All suppliers and sourcing channels follow a 6 step Quality Management Systems process to ensure products meet requisite standards to drive continual improvement in product and process quality.

Our extensive sourcing programme ensures products are certified to the relevant product AS/NZS ISO standards where appropriate.

The product quality is independently tested through chemical, physical and material performance, and functional tests to comply with AS/NZS & ISO standards. In areas where AS/NZS standards do not exist, products are tested to the appropriate EN, ANSI, DIN standards.

AS/NZS certification ensures products are safe, reliable and consistently perform the way they were intended to.

6 Step Quality System

Supplier Verification	In house quality team audit all suppliers initially and ongoing, to ensure satisfaction of the requirements of detailed audit of all QA/QC systems and OH&ES standards (Questionnaire list, Audit report-EHS/Ethical sourcing, CAR, MRB, Walk the Talk)	Annual Audits (Report, CAR, Quality)
Supplier Process QC	On site evaluate and analysis supplier's production process to ensure stable production and delivery	
Supplier Final QC	On site inspections of suppliers semi-finished and finished products to ensure they continually conform to customer specifications	
DC Quality Control	On site inspections of suppliers semi-finished and finished products to ensure they continually conform to customer specifications	
Third Party Inspection	Test and Acceptance by 3rd party international test lab (if required)	
Vendor Performance Management	Ongoing feedback loop with suppliers to drive continual improvement in product and process quality	

NZ Safety Blackwoods has operated an international procurement office in Shanghai, China since 2006.

SIMPLIFYING INVENTORY MANAGEMENT

Vendor Managed Inventory (VMI)

Vendor Managed Inventory (VMI) provides reliable and immediate availability of all your stock needs, reducing inventory holdings and obsolescence. Stock quantities for products are assessed and agreed on, and ordering can be automated or prepared for regular approval.

Onsite Vending Technology

Our vending solutions help control spend and improve process, and can be developed to assist with almost any quantity and type of product. They provide quick, managed access to high turnover product which ensures accountability, correct stock levels and reductions in downtime.

Mobile Warehousing and Scanning Solutions

If you require a remote or temporary store, or simply more space for product, we can provide a variety of mobile warehouse options to suit your requirements. Our scanning solutions let you gain total control of your inventory, enabling automatic replenishment.

Reporting that makes sense

Our suite of customisable reporting solutions can help you measure your financial objectives and jointly agreed KPI's, including cost savings and delivery performance. A standardised reporting suite can provide reports detailing site/business unit spend, contract basket spend, category analysis, order management and more.

SUPPLY CHAIN EXCELLENCE

NZ Safety Blackwoods is committed to ensuring the security and certainty of supply to customers by investing in a significant inventory holding at all 39 locations across New Zealand including distribution centres in Auckland and Christchurch and at the Global Sourcing hub in Shanghai.

NZ Safety Blackwoods uses a centralised inventory management system that maintains stock levels in each location using automated demand forecasting techniques. As a safety specialist we take shared responsibility to understand your seasonal requirements and adjust stocking profiles geographically to ensure the right safety products are available where and when you require them.

At NZ Safety Blackwoods we understand that a backorder means potentially one of your employees does not have the equipment to do the job or work safely, therefore when supplying equipment, order delivery in full on time (OIFOT) means more than a number. Driving dependable OIFOT is our commitment that a defined range will be in stock and delivered in an agreed time-frame to ensure your employees have the tools they need, to do the job safely.

Stores Management

YOUR COMPLETE UNIFORM SOLUTION

NZ Safety Blackwoods has extensive expertise and knowledge in the design, manufacture, distribution and management of corporate and industrial workwear and uniform supply.

With a team of uniform specialists to support all your needs, we provide customers with a flexible and cost-effective uniform solution.

Modification and Branding

A high-quality, branded uniform is crucial in ensuring your team is happy, comfortable and stands out from the crowd.

We provide a range of services including logo digitising, embroidery, screen and pad printing, and heat seal of transfers, along with embellishments and garment alterations.

Get the perfect fit - quickly and easily

Our body scanners use safe, cutting edge technology that maps the body utilising 3D technology. The unit uses non-invasive infra-red sensors to map over 200,000 points of the body within 10 seconds.

These portable scanners can be set up at your site to provide accurate employee measurements and sizing, quickly and easily.*

Online uniform management system

You can save time, money and resource by managing your company uniform online.

Our system facilitates individual inventory management, uniform allocation by role and shows live stock levels. With multi-level role based access and approval, employees can order the uniforms and equipment they require.

You can track down to item level, consolidate by delivery address, add custom notes for alterations, and easily manage returns. If required, reporting data can be used to create personal reports with just a few clicks.

HOSE & FLOW ASSEMBLY & TESTING SERVICE

NZ Safety Blackwoods' specialist hose and flow team have vast experience in assembling hoses and end connections to suit a broad range of industries, including petrochemical, food processing, marine, transportation, contracting and manufacturing.

As well as assembly, we provide testing, repairs and replacement services either in our well-equipped workshops or to your site with our mobile service fleet.

Our testing and inspection service is carried out by experienced NAHAD accredited staff, and can be tailored to your specific needs and requirements.

We can also provide an online hose register and tracking system through our partnership with InfoChip, providing micro-chipped hoses for more accurate tracking, company log-ins, the ability to upload data and site survey information, all supported with one-on-one training.

“AS WELL AS ASSEMBLY, WE PROVIDE TESTING, REPAIRS AND REPLACEMENT SERVICES”

POWER TRANSMISSION & CONVEYOR SYSTEMS

NZ Safety Blackwoods' specialist team will understand your specific applications and requirements, providing support from design specification and product selection, through to installation, with services including:

Power Transmission Systems

- Analysis of existing drives to determine suitability or reason for failure
- Component condition reports
- Gearbox customisation
- Free chain cutting
- Chain elongation analysis

Conveyor Systems

- On-site repairs
- Installation of all accessories from belt cleaners to belt covers
- Belt hazard and condition monitoring systems
- Belt winder and other specialist systems
- Scheduled maintenance

APC TECHSAFE

GAS DETECTION & FALL PROTECTION EQUIPMENT SERVICING

With over 30 years experience, APC Techsafe is the market leader in gas detection equipment in New Zealand. We provide the latest technologies from the world's leading suppliers, offering supply, service, calibration, training and support nationwide.

With mobile service vehicles and offices in Auckland and Christchurch, APC Techsafe service centres offer nationwide support at our place or yours.

The APC Techsafe service offer includes routine calibration, repairs and commissioning of both fixed and portable gas detectors. We also offer inspection and

“OUR OFFER INCLUDES CALIBRATION, REPAIRS AND COMMISSIONING OF BOTH FIXED AND PORTABLE GAS DETECTORS AND SERVICING OF FALL PROTECTION EQUIPMENT”

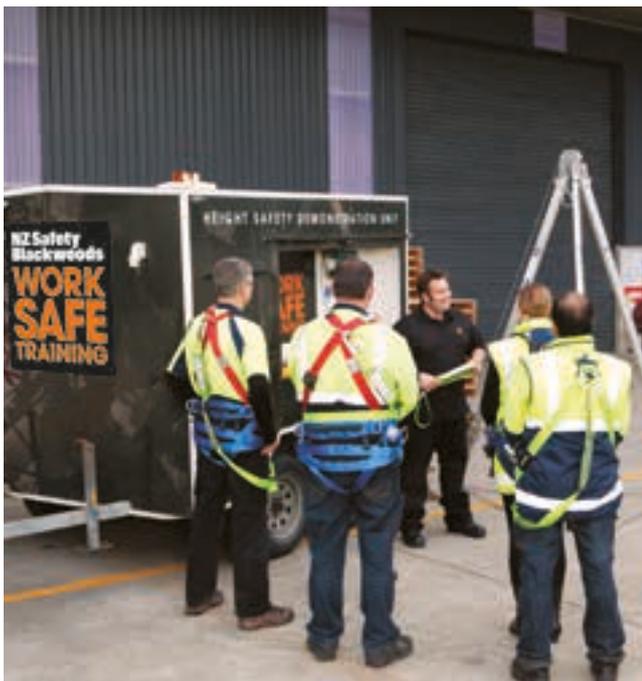

servicing of height safety equipment such as harnesses, fall-arresters and retrieval winches. Work is carried out in fully equipped workshops or in service vehicles by a team of factory-trained technicians.

Environmental Management - Compliance, Waste Management, Due Diligence, Site Contamination and Construction.

INDUSTRIAL GAS

As part of developing our full industrial offer we have recently introduced the Coregas industrial gas offer into New Zealand.

We can offer a range of high quality pure gases and standard industrial gas mixtures. These products are widely used in cutting and welding applications, plus in the most demanding applications such as laser cutting. We work closely with manufacturers to ensure that our products meet their stringent requirements for purity and tolerance.

A tailored gas package

We are able to offer a range of packages to customers to cover all their gas needs - right up to providing a Total-Gas-Assessment that covers all aspects of gas handling and improvements including providing the best supply form, customised hardware, cylinder tracking system, tele-monitoring of tanks and a comprehensive service package as well as individual contract plans.

The right support

We offer professional support for operating a supply or technical plant - ranging from engineering services and rental plans, right up to installation and maintenance. We can also provide the necessary resources and personnel and assume responsibility for safety functions such as telemetry monitoring and remote control.
